GROUP 7	10846795	10862592	10814948	10712703
GROUP 8	10905943	11173614	11173613	

3. Data Exploration Notebook & Project Kickoff

- **The Data:** Two datasets with synthetic noise:
 - CAMUS (500 pts.): Clean & noisy frames.
 - In-house (746 pts.): Only noisy frames.
- **Step 1:** Analyze the in-house images to categorize the noise types (see Lab 1).
- **Step 2:** Build a scalable denoising pipeline not to process every image manually.
 - *Hints: Rule-based algorithms, dataset statistics, ROI analysis, or upcoming clustering techniques.*
- **Intermediate Delivery:** 23:59 Nov. 4th 2026
